Experience

Apr '18 – Present

Product & Operations Lead – MetaMask

Define product strategy, roadmap, and priorities for core developers and over 100 community contributors. Create governance processes for a healthy self-organizing team. Foster a metrics-driven culture to measure individual, team, and product growth. Fill a variety of roles across marketing, business development, HR, and community.

Oct '17 – Apr '18

Senior Product Manager – uPort

Set product strategy & roadmap for dev tools and mobile teams. Led a team-wide re-organization to improve efficiency and transparency. Executed a re-build of the platform's blockchain architecture to match business needs, increase platform growth, and reduce cost per user by 40%.

Feb – May '17

Product Manager – iXperience, Cape Town ZA

Lead an overhaul of the school's admissions platform, creating a 21% increase in applications and 40% reduction in admin time. Worked with school leadership to balance academic integrity and business goals. Translated long-term vision into a tangible product roadmap.

Jan – Nov '16

Product Manager – Hillary for America, Brooklyn NY

Defined product strategy and prioritization for the campaign's fundraising platform, raising \$300M from 3.2 million individual donors. Shipped 80+ multivariate tests, multiple revenue-driving microsites, and a robust SMS donation platform. Grew a team of eight engineers and established an agile process that emphasized stability, communication, and rapid iteration.

Aug – Jan '16

Frontend Engineer – Hillary for America, Brooklyn NY

Helped re-write the online fundraising platform using React and Nuclear JS. Implemented new features for A/B tests. Wrote integration and end-to-end tests to ensure quality and uptime.

Aug '13 – Feb '14

Frontend Engineer – 3Derm Systems, Boston MA

Built a web application for doctors and patients to track skin cancer consults. Designed wireframes and UI / UX mockups for prototyping. Joined as second software engineer and fourth employee.
